Data Flow Diagram & User Stories

Project Details	Information
Team ID	6ab4a8ea6603573ccfb46a7b
Project	Script-Controlled ACL – Restrict Record Access Based on Field Value
Team Leader	Keerthika D
Team Members	losana S, Hema Priya M, Gokul
Date	15-10-2026

Data Flow (text representation)

User / Administrator → ServiceNow list or record request → evaluate ACL operation (read/create/write/delete) → check required role; for Read, evaluate Branch is EEE condition and script → allow permitted action or deny unauthorized action.

User Stories

As a…	I want…	So that…
EEE user with required role	to view permitted EEE records	I can access records relevant to my work.
User without required role	to be denied access	restricted records remain protected.
Administrator	to view records across branches	I can oversee the data.
Authorized editor	to create or update records only with required role	changes remain controlled.
