Empathy Map Canvas

Project Details	Information
Team ID	6ab4a8ea6603573ccfb46a7b
Project	Script-Controlled ACL – Restrict Record Access Based on Field Value
Team Leader	Keerthika D
Team Members	losana S, Hema Priya M, Gokul
Date	15-10-2026

User group considered: staff/student users who access institution records and administrators responsible for securing those records. These points are project assumptions based on the supplied brief, not interview findings.

THINK & FEEL	SEE
Wants student records protected; worries about unauthorized access; needs a dependable process.	Student records with ECE, EEE and CSE branch values; different user roles and permissions; sensitive details in tables.
HEAR	SAY & DO
Staff need access only for their duties; administrators need oversight; records should not be exposed.	Checks records and permissions; uses ServiceNow lists and forms; reports access issues.

PAINS / CHALLENGES	GAINS / NEEDS
Misconfigured ACLs may expose records; incorrect roles may block legitimate work; each operation needs separate verification.	Clear role-based permissions; EEE users see permitted EEE records; administrators retain full access.
