Functional Testing & User Acceptance Testing

Project Details	Information
Team ID	6ab4a8ea6603573ccfb46a7b
Project	Script-Controlled ACL – Restrict Record Access Based on Field Value
Team Leader	Keerthika D
Team Members	losana S, Hema Priya M, Gokul
Date	15-10-2026

Test ID	Scenario	Expected result	Actual result
TC-01	User with bb1 opens list.	Can read permitted EEE records when ACL is configured correctly.	Fill after testing.
TC-02	User without required role opens list.	Access is denied.	Fill after testing.
TC-03	Administrator opens records across branches.	Can view all records as specified.	Fill after testing.
TC-04	User has bb1 + bb2.	Read scope remains restricted; New/Create action available.	Fill after testing.
TC-05	User has bb1 + bb2 + bb3.	Can read and create/edit as configured.	Fill after testing.
TC-06	User has bb1 + bb2 + bb3 + bb4.	Read, create, write and delete allowed within configured scope.	Fill after testing.

UAT acceptance checklist

Acceptance item	Expected result	Status
Record visibility	EEE user sees only records allowed by Read ACL and Branch condition.	Pending actual test
Unauthorized access	User without required role cannot view restricted records.	Pending actual test
Administrator access	Administrator views records across branches.	Pending actual test
Create / update / delete	Each action requires the relevant configured role.	Pending actual test

Do not mark tests as passed until they have actually been run in ServiceNow. Attach screenshots of the table, ACL settings, EEE-user visibility, administrator visibility and action checks.
